

Commented [MOU1]: 1)"Next" – what happens if the keyword is not NEXT?

2)I feel it will go to "CMD" and then to "Sentence Appears"

3)What happens when "has Error" is No? We expect the user to say "Next" which means we will need to call the "Cmd" again

4)How do you activate "Entry mode" ? has to be a voice command right? If so, it needs to go to "X" and then to "Cmd"

5)The bottom part is extremely unclear. You need to improve this.
